Such a document was felt to be pressly needed as a justification of the long assist it may be made on the long assist the party has made on the election laws and for which last year the disapproporal of the country was so strongly manificated through the elections held in all the northern estates. Furthermore, the party is coest painfully in want of material for "uational issues," and anything that can be trumped up as a campaign document, will do. But on this occasion the material collected will tardly serve for the purpose intended. Davenport, instead of the being discomitted.

There is no question of these freeds, and there is no question that thousands on thousands armed with these bogus papers have been voting democratio ever ing the 37 417 issued by two judges in a single it's take for comparison the following at of naturalisations from 1889 to 1876 : No. Naturalizat Year. No Naturalizat.

Yet the courts have been open since 1868 for all honest naturalizations, and there has been me complaint that the proper course of ma uralization has been obstructed. Since 1870 the on open of naturalizations in the rity ef New York has been comparatively small migration till this year has been light. Mr. Davenport stated to the committee bat Ly sotal naturalizations in the city since 1876 to A been only a little over 7000. The great state of New York was carried by

the democrate in 1868, through these bogus materialization napers, and they have been no since. It was primarily to stop these colossel. wise the elections, which law the democrats Frame been attacking vehemently for years post. The naturalization laws are laws of the and it is nothing less than impudent absurdity to claim that congress may no; provide are single frauds upon the laws it has itself enscied. Of the same nature is the pretense that congress may not enagt liws to superwine the election of its own members, and to prevent frauds therein. These pre-Course are the doctrices of state supremacy gene to seed, as in secession and rebellion. The figures above given show the need of the metional law, and show moreover how it has checked the great frauds which it was desecond to meet. It is no act ou the side of Speciency in elections, not or ly in New York heat in any city where the temptation to fraud stand are abundant, and where, without such an ex as this, the rightful will of the people ght at any time be overborne by conspiraay planned and executed, as in 1868 in the city of Asw York.

Free elections have been stamped out in the contiera states. If now fraud could run rios in northern cities where there are democastic majorities, there would be to the party waxich has no chance of success through an Exponent vote of the whells people, north and santh, a most hopeful prospect o making a party which perpetrated the outrages it New Tork, and which sought to continue them by rence with the operations of the courts. by attempting to stop the supplies of the govexament and by f rong an extra ress on of can a ress; this party which has stoffed ballot tource in the south with tens of thousands of -voice and which has prevented god

Beveral cartingges and an empty backkin pures, were also found in one of his pockets. From all the circumstances there can be accurely a doubt but that the man committed suicide by drowning. In order to make a sure job he dilled his puckets with rocks so that he would be certain to sink. Substantially the jury returned a wer dict that the deceased came to his death by drowning, and that it was a case of delibrary suicide. Nothing whatever was found on the person of the man by which he can disposal suicide. Nothing whatever was found on the geron of the had on a dark, mixed diagonal suic or good quintry a pair of boot over which were Arctic shoes with edit, with a flat, black string tie about three-quarters of an inch wide.

PROM THE WILLAMETTE COUNTIES

I have been traveling for some months past in the valley countries here, and taking notes of what I saw and heard in reference to many important interests of our common country; and upon some of them I propose to write

it may not be amiss that I state the results of operating with man on at a, figure 1620 per per pound, under the quetations given ten days ago, my observations in nine of these counties. A far greater acreage was sown to fall wheat then venel, from the sect that so much of the done well. So cool and doudy has been the spring and early part of June that the wheat did not make so tank a growth of stalk as to lodge. The fine, warm weather for six weeks part has matured the wheat, outs and barley, and the lived's are long and filled to the end, with 'arge, plump grains. Much fall cuts were sown here last fall, and this crop is now were sown here last full, and this crop is now ripe and mostly harvested. The hay crop in those counties is above the average and is generally well saved. The early wheat Larvest is new on hand—cutting and threshing. The yield per arm in these counties this y armay be ast down at twenty-five bushels of wheat, thirty-live to forty of oars, and twenty-five to barley. The number of acres in these grains camnot be accurately stated, but amount how a large agargate.

I have taken much pains, for twenty months peat to ascertain the amount of orush lands reclaimed to cultivation in these countes in six years pask; aly means of flading out this matter have been ample. I therefore set down the aggregate acreage at 09,000 acrea. These trush lands are accedingly riob and productive. They are situated within and adjacent to the well settled parts of these countes, generally well watered and rolling. The Chinese bave been paid about the dollary per serie for gribbing and 85c per core for cutting the green into cord-cod. The farmers have generally hunt, the limbs and roots, Multitudes of rails have been made from the fir sapilings grubbed up. Nearly all this towns and a large rumber of the farms shouse in these counties have been half or more supplied with cordwood from these cleanings for three or four years past. Part of the sort wood for the care, steamers and furnaces of these counties has been of the second of the counties has been of the second of these counties has been of the counties has been of the second of the counties has been of the counties has been of the counties and turnaces of these counties has been of the counties the counties has been of the counties has been of the counties and the counties and the counties has been of the counties and the counties and the counties has been of the counties and the counties and the counties are counties and the coun Part of the cordwood for the cars, steamers and furnaces of these counties has been of this sort. We will set down all these grub lands in their wild condition at five dollars per sere. This would be a cost of three hondred thousand dothers. The grubbing fencing, and clearing up of them, we set down at nine hundred thousand dollars, which, added to the cost, foots up one million two hundred thousand dollars. We will credit only two crops of wheat from these sixty thousand acres, placed at fifty bushels for these two years, 3,000,000 honbels. We will accident his bush of wheat at 90 per hashel, and the two is \$2.70,000. Deduct one third for extenses and we have \$1,800,000.

The narrow gauge ratiroad from Dayten to Dullas, and from Perrydale to Shatidan, is now completed and in successful use. The grading is funished from Dalas to Monnouth. All the telegraph potes will be in place on this line, and the wires and insulators stratched, in two or three weeks. This narrow gauge road accommodates an immense farming country lying, farnisely somewhat remote from market. It will greatly stimulate the production of wheat, and cause many settlers to locate on the public leads.

and on the rail cad, college and scrows many, now convenient to this road.

These lands are rich, well weiered, ficality and very productive. On the east side of the Williamster river the same "raile will! hold good—same numerous tracts of land vacant, or for asin at from \$1 to \$2 50 per acre, on the case of the same of the same than the same. gauge company ered in plans when they run two lines of road up the Willsmette river, leaving the great interior to be supplied with mitroads by some other company.

drawing to Porland, and to other points on ahip navigation, our growing commerce and productions, the increase of our population, and the knowledge that people from atroad have of our soils, climate, easons, cheap lands, navigation, commerce, railroads, mines and timber, we may sately conclude that a bright future awaits us. Our educational facilities, christien civilization, social blessings, and all the appliances of wealth bespeak for us, the incoming multitudes of people from the fold world and from different parts of the Justed States. We are loyal and true, and we layes the day of our country and all implies. The mysic cord that vibrates from bead to heart of all true Americans binds us in cords of unity and fraternal regard to our fellow citizens in the United States. And the great arteries that pollate from the Orient to the Occident bind us together yet more irminy. We are one nation, one people, and parayized be the arm that would divide and destroy us. Let us know no east, no wet, no north, no south, but "E Pluribus Huain" DAVID NEWSON E.

A Brother seaking Information of the Studented One.

James Duncan, the missing man, left-Sonth Pass City, Wyoming, in Jone or July, 1868, in company with six others, on a prospecting tour in the Wind River mountains. He and his companions were encamped somewhere in the vicinity of Bull Lake, when they were surrounded by Indians in the morning while cooking breakfast. There were about 300 Indians in the pasty. Instead of making, for the bush they made for their horses. The Indians did not want anything better. Four of the party, including James Duncan, were killed, while Bob Kennedy, Ed Gitman and Belf Standefer (who since cited at Rawlings) encaped. When last heard from, 150 Kennedy as in Monking and Ed Gitman in Newada. A. L. DA'N in the right side, under the edge of the ribs, increases on pressometimes the pain is in the left side; the patient is rarely able to lie on it e left side; sometimes the pain is felt under the shoulder blade, and it from ently extends to the top of the shou der, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in gen eral are costive, sometimes alternative with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sen sation of having left undone some-thing which ought to have been done. A slight, dry cough is sometimes an attendant. The patient complains of wealiness and debility; ie is easily start ed, his feet are cold or burning and he compains of a prickly sensa tion of the skin; his spirits are low;

have been extensively deranged. AGUE AND FEVER.

DR. C. McLane's Liver Pills, in CASES OF AGUE AND FEVER, when taken with Quinine, are productive of the most happy results. No better cati artic can be used, preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a FA'R TRIAL. For all bilious derangements, and as simple purgative, they are unequaled.
